FAX 513-563-6757

**DIRECTIONS FOR FOGGER WITH TIMER**

**\*\*\*\*\*IMPORTANT\*\*\*\*\***

- 1) Must be used in a well ventilated area
- 2) May set off smoke detectors
- 3) Slight musty smoke odor is present
- 4) a distance of 10 feet is required from the output nozzle to the closest object because nozzle gets very hot
- 5) Possible health hazard: persons with respiratory problems or asthma should NOT be exposed at close range
- 6) Always make sure there is enough liquid in the fluid container...running the pump without liquid causes excessive wear and damage to the pump and heater

**\*\*\*\*\*PREPARATION\*\*\*\*\***

- 1) Place machine in well ventilated area
- 2) Be sure fogger's vents are not covered or restricted
- 3) Fill tank with Fog Fluid...tank capacity approximately 3/4 of a quart  
typically, 1 pint will supply enough fog for 3 to 4 hours  
large areas, such as stages/auditoriums would require 2 pints for the same time period
- 4) Attach remote control to back of the machine
- 5) Power draw is approximately 1000 watts or 10 amps...plug machine into appropriate outlet red LED will light, indicating fogger is receiving electrical power
- 6) In approximately 7 minutes the green READY light will illuminate indicating the machine is ready for use

**\*\*\*\*\*OPERATION\*\*\*\*\***

**AUTOMATIC TIMER OPERATION**

- 1) Press yellow button to activate timer...yellow LED will light indicating TIMER ACTIVATED
- 2) Adjust duration of fog blast from 1 to 12 seconds with left hand DURATION KNOB
- 3) Adjust cycle time between blasts from 10 seconds to 5 minutes with the right hand INTERVAL KNOB
- 4) Keep in mind fog will continue to come out for 10 to 15 seconds after the duration has ended

**MANUAL OPERATION**

- 1) To create fog, press and hold down green momentary switch on remote control
- 2) Release button to stop fogging...fog will continue to be produced for 10 to 15 seconds after button is released
- 3) You can create fog for up to a full minute
- 4) Green LED will go out indicating fogger is in re-heat mode...takes approximately 1 minute for re-heating, during which time pump is shut down for safety reasons
- 5) When green LED re-lights, machine has re-heated, power has been restored and the machine is ready to create more fog
