
Frozen Drink Machine Operating Instructions

1. Mix drink formula – 1/2 gallon of mix with 2 gallons of water

2. Plug in unit to 110; 15 amp outlet

***Unit draws 12 amps with compressor running**

Turn on master switch 

3. Set  agitator switch to “ON” position

4. Set switch on cooler to either cool drink  or frozen 

***Machine is equipped with a time delay relay that provides for a four minute delay from the time of the initial start. This is to prevent the compressor from short cycling. Once the compressor is on, the green light will be on.**

5. To illuminate tank light, turn on light switch

6. Do not run unit below minimum level

7. Alcohol will slow freeze time by as much as 50%. To avoid this, alcohol may be added when the mixture is served.
